Fitchbein, world leader of open mouth bag closing machines, Manufactures a large range of machines tailored to the needs of many customers. Pieces of equipment for closing open mouth bags are divided within the following categories: sewing, sealing, gluing and combined means for manual, semi and automatic processes. To complete the bagging lines, Fitchbein developed other solutions such as bag presenters, bag top upsees (with bag stops or accompanying), tag dispensers, conveyors... In addition, Fitchbein offers its customers a wide range of consumables: from spare parts, industrial sewing thread and crepe paper. For more than a century, packaging companies of every size and from every industry have relied on Fitchbein to provide the most efficient, most reliable machinery to close all kinds of filled bags. We manufacture a full range of Innovative Bag Sewing Equipment, Held Portables from our line of hand to our high speed bag sewing systems. | A new level of excellence in bag sewing technology. Also available from FitchBein is a wide variety of accessories including bag-top folders, taggers, thread or tape brake detectors and a full range of conveyors. Whether your application calls for sew through plain sew or tape or uses multi-wall paper bags or woven polypropylene, net or jute bags, Fitchbein has engineered a solution that will meet your needs more information leading in bag sealing technology, Fitchbein introduced its first bag sealer 30 years ago. Today, we offer a whole range of bag sealing solutions including hot melt adhesive closures for paper bags and our line of Saxon® brand sealer for plastic bags and pouches. Based on their sealing performance, fishbein and saxon sealers are widely used in the food, medical, chemical, mineral, fertilizer and pet food sectors. Fitchbein and Saxon Sealers are known for their durability, compact design and innovative features including secure low voltage control panels, temperature closure sensors, variable speed drives, bag jam detection and high efficiency heaters that can reduce energy requirements by up to 10 percent. Fitchbein and Saxon sealers are easily integrated into semi or fully automatic bagging lines. More information taped more information on sewing/sealing. The combination of closures will allow you to strengthen the strength and siftproofness of closing your bag More Details Conveyors are a useful supplement for your bag closing line. Indeed, it will direct peripheral support and bags full of filling station in the locked machine. More information maximizes your performance Real Fitchbein brand sewing equipment with sewing thread, needle, lubricant and crepe tape. Fitchbein consumables products are specially designed and engineered to enhance the performance and longevity of your bag sewing equipment. From hand-held portable bag sewer to fully integrated bag sewing system - Fitchbein consumables are the right choice. More information for more information over a century, Fischbein® bag sewing system set industry standards for quality, safety, dependency and cost-effective bag stitching.
